

# VIPRE™

ANTIVIRUS + ANTISPYWARE

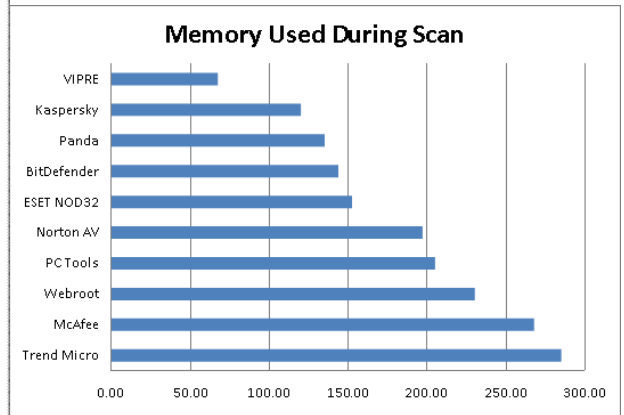

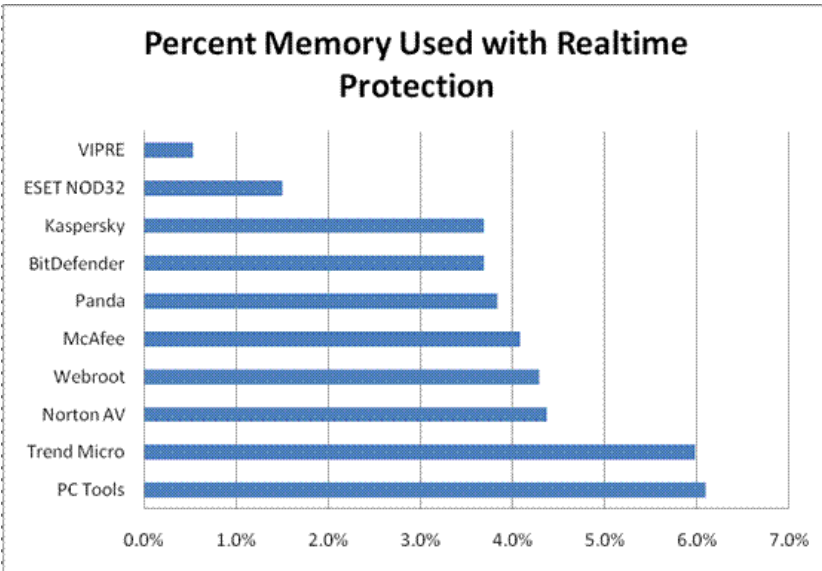

*Is your antivirus program slowing down your PC? Ditch your old antivirus software for high-performance, next-generation antivirus + antispyware that IS NOT a resource hog.*

- High-performance threat protection with low impact on system resources
- Scans email for malware threats
- Kernel-level Active Protection guards you 24/7
- Advanced anti-rootkit technologies
- Small, regular definition updates greatly reduce update downloading time
- VIPRE has three extra bonus tools: a history cleaner, a secure file eraser, and the PC Explorer for advanced users.

### Pricing

1 PC, 1 year	\$25
1 PC, 2 years	\$35
3 PCs, 1 year	\$38
3 PCs, 2 years	\$60
1 year Home License	\$45

**Pricing & Specials only when you buy from R-Tech Systems, [www.rtechsys.com](http://www.rtechsys.com)**

If your computer is attached directly to a high speed internet connection; if there is no router between your computer and the internet, then you need to have a firewall. It will protect your computer from incoming hacker threats, and block malware on your PC from accessing the internet.

## Sunbelt Personal Firewall 4™

1 PC, 1 year	\$15	<i>Add Sunbelt Personal Firewall to your Vipre Subscription for just \$8 extra (1 or 2 year subscriptions for single user license)</i>
1 PC, 2 year	\$25	
3 PCs, 1 year	\$30	
3 PCs, 2 year	\$45	

# iHateSpam v5

## Spam Is Now More Dangerous Than Ever

Annoying and often explicit email messages are an offensive invasion of your privacy. But now spam is used to try to infect your computer with malware. With the new iHateSpam v5 Outlook spam filter, you won't have to waste another minute being worried about opening up your email. Junk email is sent in real-time to the spam box where you can kill it easily without having to see it.

## Easy to use!

Unlike other products that require you to manually enter technical or password info from your email system during setup and then make you run a separate program to intercept spam, iHateSpam Anti-Spam Software runs inside of your email program. There are no extra steps required - it's that easy to have total email security!

## Automatically filter all incoming email

Once you install iHateSpam, your incoming email is automatically analyzed against iHateSpam's spam indicators to determine if a message is spam. Suspicious emails are then quarantined for your review.
